A What each system type is made of

B One map, eight colourings (t-SNE of 11,439 records)

System type
protein, nucleic acid, csat pool

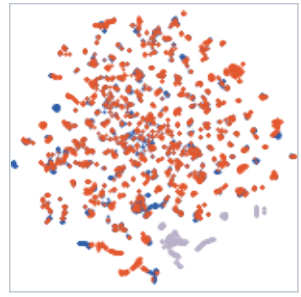

- protein only 7,490
- protein+RNA 2,511
- protein+DNA 662
- Csat pool 776

Protein
records of one protein sit together

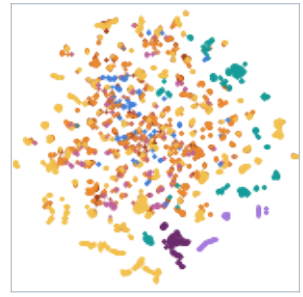

- FUS
- tau
- hnRNPA1
- SARS-CoV-2 N
- lysozyme C
- TDP-43
- A0A0G2UMW8
- DDX4
- other proteins

Label
what the paper reported

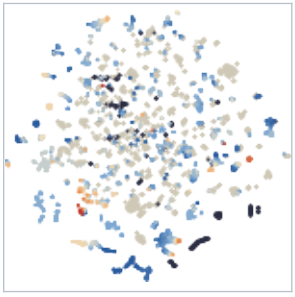

- phase separation 6,613
- no phase separation 4,050
- csat value only 776

Source
which resource the record came from

- LLPSDB v2 files
- LLPSDB v2 site
- LLPSDB v2 diagrams
- LLPSense
- RNAPSEC
- PhaSepDB 3
- Bremer 2022
- Ausserwöger

Temperature
neighbours share the temperature

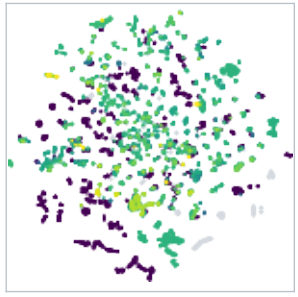

0 30 60 ≥ 90

Temperature (°C)

room temp. only missing

NaCl
ionic strength of the buffer

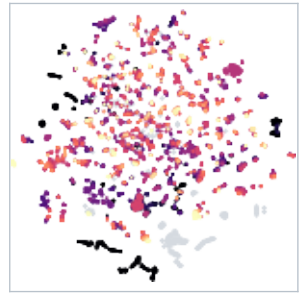

0 1 2 3

$\log_{10}(1 + \text{NaCl, mM})$

not given

Protein concentration
dilute to concentrated

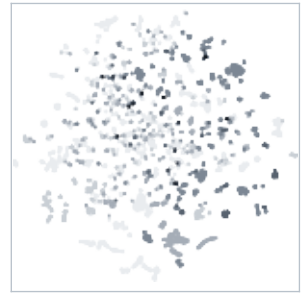

≤ −1 0 1 2 ≥ 3

$\log_{10}$ protein (μM)

not given

Missing blocks
missingness follows the source

0 2 4 ≥ 6

Condition blocks not given

Dot = one record. A: dot size = share of the system type's records in the category; colour = $\log_2$(share ÷ share among all records), capped at ±1.5.
